

Facts about Planned Parenthood

In the fiscal year ending in 2008 Planned Parenthood performed 305,000 abortions.

Planned Parenthood **puts minors on birth control** without parents' knowledge or involvement

Planned Parenthood has demonstrated a willingness to **cover up for rapists and child predators** by not reporting when pregnant underage girls come to clinics and tell personnel they are pregnant with the adult boyfriend's baby

Planned Parenthood **pushes pornography onto children** with shocking and offensive websites (www.teenwire.com) , books, and literature

While the office here in Warsaw does not offer surgical abortion services, they are still tied into the Planned Parenthood conglomerate. Plus, they refer for abortions to Planned Parenthood abortion facilities in Indiana.

Planned Parenthood of Indiana: Curbing Sexual Activity and Ending Poverty Through Abortion and Drag Shows

Planned Parenthood of Indiana president and CEO Betty Cockrum recently published an article titled "Focus Must be on Stopping Cycle of Poverty." In this article, Ms. Cockrum states, "The cycle of poverty often begins with unintended pregnancy, a problem that I try to prevent each day in my role [at PP]." She rails against abstinence education while advocating "comprehensive sex education" to stop the cycle of poverty, actually claiming that teens who are taught about contraception delay sexual activity!

So how does PP of Indiana put the rubber to the road in stopping poverty by delaying sexual activity? Every year around Valentine's Day, it puts on an event for young people called the 80's Prom: A Safe Sex in the City Event. Regarding this year's event, the PP of Indiana website reports, "More than 200 prom-goers teased their 'dos donned acid-washed duds and came out to the Talbott Street in support of Planned Parenthood of Indiana. Whether guests arrived as couples or came stag, they enjoyed DJ Logan's 80's grooves and the 'Wearing A Condom Isn't A Drag' drag show courtesy of Talbott Street's Ladies of Legends and Indy Pride.

In February and March of 2008, the organization sponsored an emergency contraception ("the morning-after pill") giveaway to coincide with spring break.

It's all about Deception

All 50 states have laws prohibiting sex with underage girls. All 50 states require health care professionals and institutions to report suspected child abuse of this type. In a remarkable expose', Mark Crutcher of Life Dynamics, Inc. enlisted the help of a young girl to call over 900 Planned Parenthood affiliate clinics and National Abortion Federation facilities in the U.S.

The girl posed as a 13 year old involved in illegal sexual activity with a 22 year old adult male who had gotten her pregnant. Crutcher reported that "in case after case, Planned Parenthood counselors willingly ignored state law to cover up these molestations and violations of statutory rape laws!" "The results of this survey were appalling. Even though many of these clinic workers openly acknowledged to our caller that this situation was illegal and that they were required to report it to the state, the overwhelming majority readily agreed to conceal this illegal sexual activity. Some employees of these organizations even coached our caller on how to avoid detection, how to circumvent parental involvement laws and what to say or not say when she came to the clinic. In a significant number of instances she was encouraged to lie about —or conceal — her age or her boyfriend's age or to give false names."

As unbelievable as all this sounds, you can listen to the actual conversations yourself at: www.childpredators.com/Tapes.cfm. What you hear will astound you.

Planned Parenthood of Indiana performs 6,000 of the 10,000 annual Indiana abortions in its abortion facilities.

Planned Parenthood Pushing Pornography On Our Children

Planned Parenthood has a deadly influence on the youth of today, through their "sex-education program" and their subtly demoralizing Teenwire website. By indoctrinating youth into their philosophies, they ensure that they will have plenty of business for years to come.

Teenwire encourages sexual promiscuity among teenagers. The site describes various birth control choices, teaches teenagers how to use condoms and encourages youth to masturbate, all the while saying that this is information that all teenagers need to know! The site gives the impression that teen sex is normal and healthy. Faye Wattleton confirmed this position when she said "we are not going to be an organization promoting celibacy or chastity".¹ Planned Parenthood assumes that teenagers have no self-control: "We've got to be more concerned about preventing teen pregnancies than we are about stopping sexual relationships."² According to the International Planned Parenthood Federation, young people are anyone between 10-24 years old. On their website, they also describe how these young people need access to abortion services and contraception. Planned Parenthood is promoting sexual activity among 10 year olds!³

IT'S ALL ABOUT MONEY

Planned Parenthood is about money. Lots of money. Your money. As a not-for-profit corporation, income for the national office and affiliates totaled \$1.038 **billion** dollars for the year ending June 30, 2008. Thirty-four percent of this **billion** dollars came from you, the taxpayer. Another 36% came from clinic activities, and 24% came from private donors. The least expensive abortions listed by Planned Parenthood cost \$350 to \$900. Using the average of these rates and the number of abortions performed, income from abortions in one year alone could have been in the \$190,000,000 range.

Your Tax Dollars At Work

Planned Parenthood Federation of America's official 2007-2008 report reveals that the total tax-payer money received by PPFA affiliates increased to \$350 million (up from \$337 million in 2006).

Here in Indiana, Planned Parenthood received \$1.8 million in tax-payer money for that year.

IT'S ALL ABOUT POLITICS

Planned Parenthood actively lobbies for abortion rights. It rigorously pursues its own interests of making abortion legal at all stages and profitable for its affiliated clinics.

In 2006, Planned Parenthood hired Cecile Richards (daughter of Ann Richards, former governor of Texas) as president of the organization. Her experience is not in health care at all, but in political action. Her previous work was as a union organizer, as the founder of "Texas Freedom Network" (formed to battle pro-life groups in Texas), as director of pro-choice projects for the Turner Foundation, and as founder and president of America Votes, a coalition of 32 of the biggest and richest unions and liberal interest groups in the country.

Jim Sedlak, executive director of American Life League's STOPP International sums it up accurately, "The appointment of Cecile Richards as president of Planned Parenthood Federation of America confirms that the organization's focus is not on health care, but rather on political advocacy."

Planned Parenthood 2007 Statistics

■ abortions
■ prenatal care

Planned Parenthood and Abortion

According to Planned Parenthood's latest report, abortions (chemical, medical and surgical) performed by Planned Parenthood facilities increased by 5% from 2006 (289,750) to 2007 (305,310). The increase came at a time when abortions were on the decline in the United States.

Planned Parenthood also says it helped just under 11,000 women in 2007 with pre-natal care and pregnancy help services. This amounts to only 4% of the total of the number of abortions.
